Azar Sabalan Consortium was established in 2000 and over the past several years has been active in various fields of civil activities in line with its reputation throughout the global arena, and has created national values and self-esteem. Its mission is the development of human and organizational capabilities for improving the lives of human beings.

Azar Sabalan Consortium as a prominent contracting company, now enjoys the latest management and technology achievements available, and with creative and efficient human resources, is one of the most developed companies within the private sector and is known internationally.

Since the company's core values are a vital part of the Organisation, quality and commitment is at the heart of all policies.

Azar Sabalan Consortium believes that only by recruiting, organizing and training the best and most efficient human resources in the construction industry, and providing the necessary infrastructure to maximize the human capabilities, the organization can react to the needs of the competitive markets in which it operates.

Azar Sabalan Consortium is now among the pioneers within the design and construction field, and this achievement was obtained by the use of its large fleet of machinery and efforts of its experts. The company has now two decades successful experience in large-scale projects such as subterranean tunnels, water tunnels, residential and commercial complexes, dams, water and sewage treatment plants, housing construction and multifunctional buildings.
